

Essex Capture Both Games With Cards

The Mt. Sterling Essex won both the Saturday and Sunday games from the Maysville Cardinals on the Mason county grounds. The score in Saturday's game was 12 to 4 and was featured by the hitting of Lackey and Potts and the fielding of Wilbers. Neyrey, who started in to pitch for the locals, was hit by a pitched ball in the second inning and was forced to retire in favor of Harrison, who pitched his usual superb game.

The box score follows:

Sacrifice hit—Wilbers. Base on balls—off Neyrey, 1. Struck out—by McCord, 1; by Brittingham, 5; by Neyrey, 1; by Harrison, 5. Wild pitch—McCord. Hit by pitcher—by McCord (Blake, Neyrey). Hits—off McCord, 6 in 2 innings; off Brittingham, 9 in 7 innings; off Neyrey, 4 in 2 innings; off Harrison, 5 in 7 innings. Left on bases—Mt. Sterling, 2; Maysville, 7. Time—2:05. Umpire—Shade.

Sunday's Game
Neyrey again essayed to pitch for Mt. Sterling, but was taken out in the first inning after he had yielded two hits which netted the Cardinals two scores. Harrison was again substituted and held the Cardinals scoreless with the exception of the sixth inning, when Class hit his second home run of the game. That boy Harrison is certainly some pitcher and is dreaded by all opposing batsmen. The final score was 8 to 3.

The box score follows:

Last Thursday's Game
A large crowd from this city journeyed to Winchester last Thursday afternoon confident of seeing the Essex take the measure of the Winchester Dodgers, but in this they were disappointed. However, they had the

PROMINENT REAL ESTATE MAN DIES IN TAMPA, FLA.

George H. Seal, 49 years of age, a prominent real estate man of Kentucky, died last week at his home in Tampa, Fla., where he went two years ago in behalf of his health. Mr. Seal had been in bad health for several years. He retired from his business three years ago, eighteen months of this time having been spent in bed. He is survived by his widow, two daughters, Mrs. Henry F. Tipton, of Greenville, Miss., and Mrs. T. E. Rogers, of Atlanta, Ga.; one sister, Mrs. Sam Black, of Troy, this state; two brothers, Bruce Seal, of Nicholasville, and Dan Seal, of Knoxville, Tenn. Mrs. Seal is a sister of Mrs. W. T. Fitzpatrick, of this city, and Mrs. J. T. Wilson, of Florida, formerly of this city, and Mrs. H. F. Haney, of Winchester.

Mr. Seal was also prominent among Kentucky trotting horse men. He at one time had charge of several fine horses at Lexington, and had traveled throughout the country with Scott Hudson. He had served as judge at various fairs in the state and at track meets. In later years he was engaged in the real estate business, in which line he was very successful. Fifteen years ago he opened an addition near Ponce de Leon Park, Atlanta, which is still called Seal Place. He was a deacon of the West End Presbyterian church at Atlanta, Ga., for fifteen years. He was a man who will be missed by all who knew him, old and young, he being a great lover of children.

pleasure of seeing one of the prettiest pitchers' battles of the season, the final score being 1 to 0 in favor of Winchester. From start to finish the game was a pitchers' duel between Ferrell for the locals and Powell for Winchester. The game was won on a three-bagger by Hise and a fielder's choice. Only six hits were made during the nine innings, two off Powell and four off Ferrell.

Winchester Here Thursday

The Winchester Dodgers will be the attraction at the local park on Thursday afternoon and an immense crowd is expected to be present as the Essex are determined to get revenge for the defeat they suffered in the Clark county capital last Thursday. Winchester is going especially good just at this time and a battle royal is looked for.

Gas Well Struck On Hon Co. Lot

At a depth of 150 feet the, company drilling for oil on the Hon Packing Company's lot on East Main street came into a strong flow of gas in quantity sufficient. It is thought by the expert drillers, to supply the packing company for light and fuel for the packing plant. The experts were expecting gas at this depth and are figuring on striking the first oil sand at a depth of about 325 feet. The find quickly spread over the city, but caused little excitement, as this was no more than was expected, for at a depth of about the same distance gas was found on the Baumont Hotel lot and at a depth of about 100 feet gas was found on the lot where the McCarty Garage is now located, and at a depth of between 350 and 400 feet on the Baumont hotel lot an oil well was brought in that produced at the time, it was estimated, from one to five barrels per day.

SEWING ROOMS OPEN

After a two weeks' vacation, I have opened my sewing rooms and invite the ladies of Mt. Sterling and vicinity to call on me for work.—Miss Ola Rogers.

POSTMASTER SELLS \$3,675

WORTH OF CERTIFICATES
According to Postmaster Turner, treasury savings certificates to the value of \$3,675 were disposed of at the Mt. Sterling postoffice during the month of July.

"An investment in treasury savings certificates is a 'sure-fire' method of safeguarding one's savings. It is needless for me to dwell upon the safety of funds so invested, as payment of both principal and interest is guaranteed by the United States government," Postmaster Turner declared. Money invested in these certificates will increase 25 per cent in five years, and at the present time they will net the buyers a much higher yield than any other government security. These certificates can be secured at the postoffice in denominations of \$1,000, \$100 and \$25 at cost prices of \$8,000, \$80 and \$20 each, respectively, the postmaster declared.

COMING COUNTRY FOR FATHER

With only a tiny photograph and her great determination, Miss May Stapleton, of Liverpool, England, 16 years old, has started to comb the United States in an effort to locate her father, who has been missing four years. Liberated from Ellis Island after an uncle had certified that his niece would not become a public charge, Miss Stapleton, showed the little lock on a chain around her neck which carries the picture of her missing parent. "All efforts to trace him abroad have failed," she said, "but before I abandon hope and regard my father as only a memory, I want to search America."

FOR SALE—Nine-room frame residence in most desirable neighborhood. Centrally located, West High and Elm streets. In perfect condition. Bath, gas and lights. Strictly modern. Can be used for two separate apartments.—Call 303. (84-1f)

CAMPING PARTY

Mr. and Mrs. S. C. Sharp left Sunday for a two weeks' camping trip on the Cumberland river. They will chaperone the following party: Misses Mary Cral, Annie B. Plunney, Mary Vansant Robertson and Elizabeth Jackson, of Winchester; Claude Kilpatrick, Howell Hunt and Matt Skinner, of Lexington. Smith Ratliff will be the cook for the party.

FOR SALE—Oldsmobile roadster, mechanically good and looks good.—W. B. Day. (78-1f)

WELLS-SKIDMORE

Announcement is made of the marriage of Mrs. William Wells, 412 South Upper street, to Daniel Skidmore, of Mt. Sterling, at Hamilton, Ohio, July 17. Mr. and Mrs. Skidmore will make their home in Ohio.—Lexington Leader.

Some folks are always talking about rest for the weary, but the trouble is they get weary six days in the week, and they have got to rest up all day Sunday.

Harding Makes Final Appeal to Settle Strike

As a "final call" from the government for immediate settlement of the rail strike, President Harding last night communicated to railroad executives and heads of the striking shop crafts unions proposals that the men be sent back to work, that the managements take them back, and that adjustment of the crucial seniority issue be left to decision of the railroad labor board.

Though the president was said to consider this the only practical course the government could take, union spokesmen, indicating its rejection, summoned their associates to meet Wednesday to pass on the proposal and called to Washington for general conferences Friday heads of all railroad labor organizations to consider methods of co-operation that might make the strike more effective. Rail executives had had no response to the White House last night, though press dispatches indicated they also would meet to frame a collective answer.

Woman's Exchange will have on Wednesday ham, pickles, etc.

COLORED FAIR CLOSING

The second annual fair given by the Montgomery County Colored Fair Association closed here Saturday after a successful four days' meet. The fair this year even surpassed that of last year and much credit is due the officers and directors of the association for the splendid manner in which the fair was conducted and the high-class entertainment which was offered. Excellent racing programs were given each day and a drawing card of the entire week was the beautiful music furnished by the famous Booker T. Washington Band, of Louisville. Notwithstanding the bad weather of two days of the fair, the gate receipts were fine and the association is planning even a better and bigger fair for 1923.

Coal Strike May Be Settled Soon

Settlement of the soft coal strike under a definite plan that may result in the making of wage agreements on substantially a national basis will be presented to a conference Wednesday of coal operators, who are expected from all parts of the country, with officials of the union miners. In the main, the plan provides resumption of coal production by union miners under wage scales that existed when the strike began April 1 and for the appointment of an advisory commission of inquiry within the coal industry, the personnel to be approved by President Harding.

WINS CABINET

Mrs. Anna Sampson, of Aaron's Run, was the holder of the lucky key and was awarded the handsome kitchen cabinet given away by L. M. Redmond. Hundreds of keys, one given out with each purchase amounting to twenty-five cents, were presented at the store, the one unlocking the cabinet being held by Mrs. Sampson. The contest, one of the most unique ever put on here, attracted much attention and Mrs. Sampson's friends are greatly pleased over her good fortune in winning the prize.

A flapper, as we understand it, is a young female with rouge on the outside of her face and gum on the inside.

HEMSTITCHING

I have moved my hemstitching machine from the Ladies Specialty Shoppe to Miss Bettie Roberts' millinery store, Main street, and would appreciate your patronage.—Mrs. George Turner. (pd)

TRAINING SCHOOL

There is a training school in session for Christian workers at Winchester this week and Rev. J. W. Crates, pastor of the local M. E. church, is in attendance. The men's class of this church has a special invitation to attend and contemplate going down in a body by auto next Sunday.

WOMEN'S WORK COUNTS

Kentucky Baptist women have given \$924,617 to the educational and missionary campaign of the Southern Baptist Convention during the last three years.

BRACKEN ASSOCIATION OF BAPTISTS HOLDS MEETING

The Bracken Association of Baptists, of which the local church is a member, was in session at Millersburg last Wednesday and Thursday. Messengers from the local church were Rev. Otus Hamilton, Rev. Noel Hodges and son, Frank; Grover Anderson, Cecil Greene and J. W. Hedden. Sr. Mrs. Grover Anderson and Mrs. Cecil S. Greene represented the women's societies of the church.

There was a large representative body present. The \$75,000,000 campaign budget received an encouraging report. The third year in this work shows Kentucky leading other southern states. State, home and foreign missions showed an increase in membership. The two Baptist orphan's homes are taxed to their limit and two more of like capacity would be easily filled. The locating of two homes, one for western and the other for eastern Kentucky, may be considered later. This association has decided to put a missionary in the field with a salary of \$1,800 and this will be definitely arranged for at the September meeting of the board.

We want to say that the eutertainment of the body was grand in the superlative degree. The association goes to Maysville in August, 1923. Pastor Otus Hamilton, of this city, is appointed by the association to preach the missionary sermon and the highest honor conferred on the editor was the appointment of him to represent this association as messenger, with expenses paid, to the Southern Baptist Convention that meets in Kansas City, Mo., in May, 1923.

This was not only a prosperous meeting with greater work laid out for 1922 and 1923, but a real joy meeting.

WANTED—A four or five room cottage. Call H. A. Babb. (85-2t)

AT HOME

Rev. Father E. J. Corby has returned from a Lexington hospital restored to health, but not yet in his usual physical strength. Rev. Corby will have supervision over his flock and will be actively engaged with the return of strength.

T. K. BARNES & SONS' SPECIAL
Welsh grape juice, 60 cents a quart. (85-2t)

INFANT DIES

Raymond, the eight-month-old son of Oswald McLean and wife, died Saturday after a short illness and was buried in Macphelah cemetery Sunday afternoon after services at the grave conducted by Rev. B. W. Trimble.

STRAYED—To my place on Levee pike, one helper. Owner may have same by proving property and paying charges.—S. L. Taylor. (84-2t)

SOME TOMATO

Charles Ragan brought to our office this morning a tomato which he raised, weighing one pound and ten ounces. It is one of the largest we have ever seen, and Mr. Ragan states that if there is anyone who can show a larger one, he'll do better next time.

FOR RENT—Three rooms for rent. Close in. Phone 32.

1,800-MILE AUTO DRIVE

Mr. and Mrs. E. Harry Moss arrived here last night from Casper, Wyoming, and are the guests of Mr. Moss' parents, Mr. and Mrs. E. H. Moss. The trip of over 1,800 miles was made by automobile and was without mishap.

TENT MEETING

A tent meeting will begin at Stoops Friday night, conducted by Revs. W. M. Triplett and W. H. Thompson.

PICKLING

Use only the purest of vinegar and spices. We can supply you. T. K. Barnes & Sons. (85-2t)

W. J. Fields Easy Winner In District

Congressman W. J. Fields was an easy winner at the primary held Saturday, being renominated in this, the Ninth district, by a large majority. J. Campbell Cantrill was an easy winner in the Seventh district, while Congressman John W. Langley walked away with his "jailed jailer" opponent, Fess Whitaker. The vote all over the state was the lightest ever cast at a primary in Kentucky. In Montgomery county the vote was especially light, and resulted as follows:

W. J. Fields, 515.
H. C. Duffy, 100.
W. T. Cole, 12.
R. G. Buckler, 6.
Total number of Democratic votes, 638.

The Republican vote resulted as follows:

J. H. Stricklin, 64.
Trumbo Snedegar, 27.
George Osborne, 26.
Total number of Republican votes, 117.

The result of the race for the Republican candidate for congress from this district is very close and is still in doubt.

HOUSE WANTED—I want to rent a house and would like to have immediate possession. Call or see Arthur Richardson, phone 304.

HERE TO RESUME PROFESSIONAL DUTIES

The hearts of many will be gladdened when they read these lines informing the public that Dr. W. R. Thompson, after an absence of 12 months and more, is fully restored to health and is ready for the practice of his profession. The doctor will have office rooms in the Traders National Bank building. While building up his own health Dr. Thompson has made a special study of nervous troubles, practiced on nervous patients and performed the surgical operations needful in the treatment of such cases. He, therefore, returns to Mt. Sterling not only a well man, but better equipped to render service to suffering humanity.

The doctor has by experience learned that no man has an iron constitution and that if he is to be effective in the best interest of the sick that there is a limit to endurance. In addition to the performing of professional duties Dr. Thompson has been a leader in all progressive interests, city and county, and business men as well as those who may need a doctor will be glad Dr. Thompson is in Mt. Sterling again.

AT RINGO'S

Dressed trying sized chickens Fridays and Saturdays. Sliced country ham.

ODD TYPES SEEN IN REX INGRAM PICTURE

From the epic, with its broad universal sweep, to the cameo-like short story, may without exaggeration, be applied to the progress made by Rex Ingram, the wizard Metro director, whose latest production, "The Conquering Power," appearing at the Tabb Theatre Wednesday night. "The Four Horsemen of the Apocalypse," adapted from the famous Ibanez masterpiece, had a rush and sweeping magnificence that evoked a sense of massive power of Homer and Dante. "The Conquering Power," the screen adaptation of Balzac's novel, "Eugenie Grandet," differs materially from the first; it presents a cross-section of the people in a tiny French village, revealing the inner psychological workings of some fascinatingly odd and divergent types: a miser, a cowed helpless wife, a gay Parisian flaneur, a martyred daughter, a bankrupt father. For an intensive study of provincial family life and an arresting story, it is unparalleled.

MODERN GIRLS PRAISED

Is the modern girl a home-maker or a home-breaker?

How do bare knees, painted lips and bobbed hair square up with the doctrine of home-made apple pie, biscuits and baby tending? What kind of a matrimonial bet is the modern maid and what chance for happiness does the man have who marries her?

A mighty good bet, says Miss Edna Kinsinger, veteran teacher of domestic science at Soldam high school at St. Louis, best known public secondary school. Miss Kinsinger has been teaching Soldam girls the art of home-making for years, and, in her opinion, the modern girl will "stack up" against any of them.

"I should say unhesitatingly that the type of girl who passes through our classes is the most promising home-making material in the world," said Miss Kinsinger. "The girls take naturally to domestic science. They are very proud of the hats and the dresses they make here and the simple meals they learn to cook. I've never heard one of them complain about washing dishes."

Blame for the shortcomings of the modern girl is to be attributed to mothers, Miss Kinsinger declared. "Don't blame the girls," she said. "Blame the lack of home training. Let me tell you, too, that poor people offend as much in this respect as the rich."

"A busy mother frequently will not take time to teach her girl. It's easier and quicker to do things herself. In well-to-do homes the daughter doesn't dare go into the kitchen for fear of offending the cook. And when the time comes for a girl to go into a little home of her own her husband is the victim of her ignorance."

"No sane man would place his son in a position of great responsibility without giving him proper training. But hundreds of girls undertake the most important and highly specialized profession—that of housekeeping and mother—without a moment's preparation."

"Remember, too, in discussing the training of girls for their work in the home, that demands upon them today are different from what they were in the past. A man doesn't want to come home to a grubby, tired household drudge who hasn't the energy left to 'fix up' and go to the movie. He wants a chum and a friend, as well as a housekeeper."

"Girls nowadays, as I see them, are intelligent, wide awake and ready to look life right square in the face. If I were a man I'd take a chance with a girl like that with much more confidence than with one of the ineffectual little goody-goodies of a generation ago."

SILOS PAY BIG PROFITS

When you make a time deposit at your bank you have in mind the interest you will collect at the end of the year. When you buy stocks and bonds you have in mind the dividends. In other words, you are thinking about the return you will get on your investment in terms of interest.

Why not think of the silo in this way. Usually when you think of a silo you think of it as a means of producing more milk and butterfat. Why not translate this into terms of interest? Let us consider the silo as an investment and see what interest it will return.

Take a 100-ton silo as the size found on the average farm. It will require the product of ten acres of corn to fill this silo. If this corn yields 40 bushels per acre, 400 bushels of corn goes into the silo. Now compare the feeding value of the 100-ton of silage with the value of the crop had the corn been harvested and sold and the stalks been pastured.

The present feeding value of silage is about \$5 per ton; 100 tons are worth \$500. Remember that this includes all the cost of putting the silage into the silo; in other words, you should be able to buy silage of your neighbor at this price. The value of the same feed in terms of mature corn and pastured corn stalks would be:

Shelled corn, 400 bushels, at 50 cents, \$200; 10 acres of corn stalks at \$1.40; total feeding value, \$240.

Now we will have to figure in the cost of husking and cribbing the corn—conservatively, this is five cents per bushel or \$20 for the crop, which much be charged up against the feeding value, leaving \$220 as the net return.

Thus it is seen that when the crop is put in the silo it is worth just \$220 more than when it is harvested and pastured.

You can build a permanent 100-ton silo for \$600 or less. If you had to borrow the money to build it the interest on your loan at 6 per cent would be \$36, which subtracted from \$220 leaves \$184, as representing the net increase in feeding value of the ensiled crop.

The \$244 is more than 40 per cent return on our investment in a silo. Will your banker give you that much for the use of your money or can you buy any reliable stocks and bonds and expect such dividends.

The man who is bent on matrimony has to keep straight.

RE-ELECT FLAHERTY SUPREME KNIGHT

James A. Flaherty of Philadelphia was re-elected Supreme Knight at the national rally of the Knights of Columbus at Atlantic City. The Knights spent over three million dollars last year in helping disabled soldiers.

THE NATIONAL GAME

There is no question that baseball is the national game of America and it is coming more and more so every year. Of all the games and sports in many things it constitutes a good player. It requires judgment, wisdom, alertness, courage, wit and strength. It is really a game which typifies the American character. The same things which it takes to make a good ball player are required to make a success in business. Of course, there are successful business men who were poor ball players or not ball players at all. On the other hand there are successful ball players who would not make a success in the business arena comparable to their success on the ball field.

The qualities, however, which enter into the making of a good ball player are those which the American public especially admires. They like a cool man who does not lose his head in a crisis and they like to see the same thing displayed on the diamond as in a pitcher when the batter has run out and given him the ball and the next pitch may determine the game, or in a fielder when he catches a hot line and throws it immediately to the right base to get the second man. We like in business life to see a man of good judgment, and the ball player who does not display the same quality is called a blunderer. We never like to see a man go to sleep on his opportunities and we admire the same alertness in a ball player who is on his toes as in a business man who comes into the way immediately and who is never caught napping on his base.

We like wit and courage in a speedy age. We want to ride on a fast train. We want to drive the automobile rapidly and we do not like a slow, old, foggy way of going after things. This is the reason why the "fast" all star when a ball player is with enough to beat a horse down to first base.

We like strength. In fact, nothing appeals to us more than to see evidence of it in all walks of life and that is the reason why the grandstand at a ball game goes wild when a player knocks a home run and likewise why Babe Ruth is nearly as well known in the United States as the president.

So we say again that baseball is the national game because it represents what the average American most admires in life. Baseball is very different from horse racing. The race is over, while the ball game usually gives you thrills for two hours. Then again the ball games are generally clean, while races are not often so. Golf is a game that is only interesting to those who are playing, while a baseball game is of just as much interest to the spectators as to the player.

As soon as the American school boy gets big enough to throw across the fence and get a baseball and it is not long after that before he gets a bat. He is a ball player at twelve and after he quits playing he is a fan for the rest of his life. There is no better recreation than playing baseball and when the average school boy doesn't want to play there is something wrong with him.—Exchange.

We are not acquainted with the writer of the above editorial, but since it gives in a large measure our mind we give it space. The races are given to existing recreation and sport, and especially in this applicable to Kentucky. A race is needed to all people of whatever calling or profession there may be, and nothing appeals more to men than baseball.

That there are reprehensible features in this game we could not successfully deny, but these features must be guarded in order to elevate the player to manly growth and win the admiration of cultured spectators.

LOCATES HERE

Prof. Arthur G. Johnson.

Prof. Arthur G. Johnson, professor of history and athletics, who comes to the Mt. Sterling high school for the coming school session, was here with his wife Saturday looking for a home. Prof. Johnson graduated from Kentucky Wesleyan College, Winchester, this year, receiving the degree of A. B. and O. M. He graduated from the Clark county high school in 1914, being active in all athletics in that institution for four years. He coached the girls' basketball team of the high school in 1914. He is an ex-service man and was wounded in the Argentine offensive on September 14, 1918. Before his graduation from college he was a leader in athletics and college social circles. He was president of his class for three years, and also president of his dramatic club and literary society and a member of the student government council.

Farm women enrolled in agricultural extension poultry clubs last year raised 2,612,127 standard brood chickens. They received for chickens and poultry products sold \$1,417,447.42, in addition to the supply produced for home use.

Isn't this rather a late day to be picking flaws in the character of the late G. Washington. A New Jersey prohibition paper is laying him for having "maintained a still on his Mt. Vernon estate." So did everybody else at that time.

SALE!

Attention Builders and Housekeepers.

Pick Up A Bargain At The Electric Shop.

SATURDAY, AUGUST 19, 1922

at 2:30 p. m., I will offer For Sale one article at a time, and at PUBLIC AUCTION to the highest and best bidders, the entire stock of goods of the Electric Shop at its place of business in the building of H. C. McKee on South Bank Street in Mt. Sterling, Ky. This stock includes:

One Divanette

One Cook Stove
Two Gas Heating Stoves.
One Refrigerator
One Kitchen Cabinet, Baby Bed, Dishes and other things too numerous to mention.

JOHN J. WINN,

Assignee of Mrs. Florence Bohlke

The new Goodyear Cross-Rib Tread Cord

A New Tread—a Lower Price Reliable Goodyear Quality

Here is a new Goodyear Cord Tire—a big, sturdy, long-wearing tire—that sells at a price lower than you are asked to pay for many "long discount" tires of unknown value.

It has a different tread from the famous Goodyear All-Weather Tread Cord—a new tread with a deep, clean-cut, cog-like pattern—and it sells for substantially less.

It has in it the same high-grade long-staple cotton, the same Goodyear patented group-ply construction, the same liberally oversize dimensions.

When you buy the 4 1/2-inch size, for example, you get a tire whose actual measurement is nearly 5 inches.

Don't confuse this Goodyear Cross-Rib Tread Cord with other popular-price cords which sell at the same price or for slightly more.

In many cases, these other cords are made of inferior materials, with short-staple cotton as a foundation.

Get the tire that is good enough to carry the Goodyear name, that is built to safeguard the world-wide Goodyear reputation.

Compare these prices with NET prices you are asked to pay for "long discount" tires

30x3 1/2 Clincher.....	\$12.50	32x4 Straight Side..	\$24.50	33x4 1/2 Straight Side..	\$32.15
30x3 1/2 Straight Side..	13.50	33x4 Straight Side..	25.25	34x4 1/2 Straight Side..	32.95
32x3 1/2 Straight Side..	19.25	34x4 Straight Side..	25.90	35x5 Straight Side..	39.10
31x4 Straight Side..	22.20	32x4 1/2 Straight Side..	31.45	35x5 Straight Side..	41.05

These prices include manufacturer's excise tax

Goodyear Cross-Rib Tread Cord Tires are also made in 6, 7 and 8 inch sizes for trucks

FOR SALE BY

MT. STERLING GARAGE

GOOD YEAR

MONEY TO LOAN

It will be observed in another column in this issue of The Advocate that the Kentucky Joint Land Bank through the Hoffman Insurance Agency is loaning money to farmers of this section and to this end have renewed their advertising. J. Miller Hoffman, the head of the insurance agency, considered this company's business methods from every business angle and after the most thorough investigation concluded that their methods are verily the farmers' friend. Mr. Hoffman does not accept business propositions without giving them close study and his acceptance of this Kentucky Joint Land Bank is a guarantee that the farmer who does business according to this method is wise; that he is in good hands; that the loan never comes due, and that it automatically cares for itself by paying both principal and interest in forty years. All the farmer that borrows has to do is to pay the interest, which is \$66.46 per annum on the \$1,000 borrowed. For instance, a loan of \$10,000 would cost \$664.60 per annum for the period of forty years, when the mortgage on the farm is released and the farmer becomes a free man. A talk with Mr. Hoffman would explain to the borrower this method and to adopt these easy payments will relieve floor-walking disturbances and make money that pays the debts while the farmer sleeps. Farmers, tell your money troubles to Mr. Hoffman; he has the relief.

A scientist and his wife are climbing one of the highest mountains in the Rockies, looking for a bottle they planted there 21 years ago. Well, if it's good stuff, it's worth climbing for now.

If desire for drink is evil, then the American people are the wickedest on the face of the globe.

Thousands of citizens of Nashville have failed to pay their taxes this year, the list requiring ten pages of the Banner. We suppose the Nashville folks, like people everywhere else, are tired of taxes and have gone in for gasoline, radio and jazz.

A voice from the grave. John Barleycorn still claims that you cannot keep a good man down, and like other good fellows he will refuse to stay put.

CARTER—CAIN

A wedding of unusual interest that came as a surprise to the many friends of the contracting parties was that of Miss Mary Sadie Carter and Luther McEwan Cain. The young couple, accompanied by the bride's cousin, Miss Mary C. Glover, of this city, and the groom's mother, Mrs. J. Andrew Cain, and brother, Benjamin Cain, of Lawrenceburg, and Mr. and Mrs. William Cain, of Shelbyville, motored to Louisville on Thursday, August 3, and were married at the home of Mr. and Mrs. George Coleman, cousin of the groom. The ceremony was performed by Rev. F. M. Pelly, of the Methodist church, the beautiful and impressive ring ceremony being used. The bride is the only daughter of Mr. and Mrs. John H. Carter, of Bath county, and is a very cultured and attractive young woman who by her sweet and pleasant manner has won many warm friends. Her brunette beauty was enhanced by her stylish costume of night blue and large black hat. Her corsage bouquet was of butterfly rosebuds and bourdais. The groom is the son of Mr. and Mrs. J. Andrew Cain, of Lawrenceburg, and is a young man of splendid

character and fine business ability, and is held in high regard by all who know him. He is a graduate of Kentucky Wesleyan College, Winchester, and has been employed as teacher of science in the Mt. Sterling high school, and comes to our city highly recommended as an instructor. The marriage of these young people is the culmination of a happy romance which began several years ago at Wesleyan College, where both were students. After a short bridal trip they will return to this city to live.

A woman is to contest with La Follette for the senatorship of his state. She'll have to bob her hair if she expects to hold her own against that wild and bristly pompadour of Robert's.

A scientist estimates that it will be one thousand years before it will be possible even to estimate the rate of decrease in the earth's heat. That ought to hold the people who are trying to grab it while it is hot.

One Mt. Sterling man, grocer, is our idea of a perfect gentleman. When a taster steals a piece of cheese, he gives him a cracker to go with it.

You get all the cream with a De Laval

Not every separator is designed so that it will get all the cream. But there is one machine that can always be depended upon to skim clean—the De Laval.

A De Laval user gets more cream from the milk of each cow, gets longer service from his machine, and spends less time turning and washing it. Ask any of them.

Wouldn't you like to know more about the De Laval? Stop in.

De Laval butter has won at every meeting of the National Butter-makers Association, with one exception.

Miss Bettie Rogers is visiting relatives at Carlisle.

Miss Susan Wells has returned from a visit in Winchester.

Mrs. William Anderson has returned from a stay at Olympian Springs.

Mrs. Jack Owings will leave tomorrow for a visit to friends in Chicago.

W. P. Treadway, Sr., and W. P. Treadway, Jr., have returned from Ashland.

Miss Florence Anderson is visiting relatives and friends in Winchester this week.

Mrs. W. P. Treadway is visiting her son, L. V. Treadway, at Middletown, Ohio.

Miss June Bush Hunter, of Winchester, is the guest of Miss Sara Frances Hamilton.

Miss Garnett Frederick, of Maysville, is the attractive guest of Mr. and Mrs. W. B. Small.

Mrs. Forrest Suter, of Louisville, has been the guest of Mrs. E. E. Beall and Miss Mary Beall.

Mr. and Mrs. G. Berry Pieratt, of Chicago, are guests of Mrs. Rosa Pieratt and other relatives here.

Miss Lucy Montjoy has returned from Lexington, where she visited her aunt, Mrs. Blythe Anderson.

Rex Hall, of this city, and Maurice Miller, of Winchester, left yesterday for Atlantic City and New York.

Miss Elizabeth Lewis, of Farmville, Va., will arrive Thursday to visit her aunt, Mrs. Ben R. Turner.

Miss Mary Ellen Whitman, of Shelbyville, has returned home after a visit to Mr. and Mrs. Frank Whitman.

Rev. and Mrs. J. W. Crates and Misses Florence and Anna Bright Crates are visiting relatives in Winchester.

Mrs. Lydia Herriott, of Oklahoma City, arrived yesterday for a visit to Dr. and Mrs. J. Keller Johnson and other relatives.

Mrs. George C. Eastin and Mrs. Charles W. Kirkpatrick and son, Lewis, will leave Monday for a stay at Atlantic City.

Mrs. Gertrude Gillespie, of Cincinnati, is visiting her brothers, C. C. Boyd, of this county, and W. A. Boyd, of Bath county.

J. W. Hedden, Jr., spent the week-end with his wife, who is ill at a hospital in Ironton, Ohio. Hedden's condition is improving nicely.

Mr. and Mrs. A. L. Tipton, Mr. and Mrs. William Tipton and children and Mr. and Mrs. W. T. Hunt and daughter, Emily, spent Sunday at Oil Springs.

Mrs. J. W. Collins and Mrs. Kenneth Collins, of Tallahassee, Florida, are the guests of Mr. and Mrs. John L. Coleman at their home on West High street.

Miss Gertrude Dennis left Wednesday for New Mexico. She will visit Chicago, Kansas City, Denver and Santa Fe. After a two months' stay in New Mexico she will visit relatives in Texas.

Mrs. B. P. Jeffries will leave tomorrow for a visit to Mrs. Frank Folger in Jessamine county. She will be joined on Friday by Mr. and Mrs. W. K. Prewitt and son, who will also be guests of Mrs. Folger.

Matt Rogers and Misses Ola Rogers, Nancy Oldham and Nellie Guy returned Friday from a two weeks' visit with Mr. and Mrs. Isaac Rogers, Jr., at Indianapolis. Ed Rogers, who accompanied them to the Hoosier city, has accepted a position and will remain there.

Miss Dovie Parrish, of Richmond, is the guest of Miss Georgia Kerns.

Miss Irene McNamara is in Covington visiting her sister, Mrs. Edward Mathias.

Mo., and is spending a part of her vacation with relatives and friends in this county.

Miss Lily McNamara, of Covington, is the guest of her mother, Mrs. P. McNamara.

Mrs. Leo H. Hombs left yesterday for St. Louis to visit her mother, Mrs. Ida Berry.

Mrs. R. E. Toms, of Chicago, is here for a short visit to her parents, Mr. and Mrs. A. H. Judy.

Mrs. L. Tipton Young has returned to her home in Louisville after a visit to her father, L. T. Chiles.

Miss Edith Fitzpatrick, of Ashland, is the guest of Miss Marguerite Newmeyer.

Mr. and Mrs. Matt C. Clay left Sunday for Rochester, Minn., where Mrs. Clay will consult with the Mayo Brothers.

Mrs. Rada Phelps, of Carlisle, and Miss Martha Poladexter, of Winchester, are guests of Misses Sally and Anne Clay.

Mrs. William Catron and Mrs. William Greene have gone to Asheville, N. C., for a visit to Mr. and Mrs. Will Hoskins.

Mrs. Charles Humphries and Miss Eliza Jamison were in Lexington on Saturday to attend the funeral of George Seale.

Mrs. Henry W. Senieur has returned from Charleston, W. Va., where she visited Mr. and Mrs. Charles Senieur and family.

Mrs. Kenneth Collins, of Tallahassee, Florida, arrived Saturday for a visit to her parents, Mr. and Mrs. John L. Coleman.

Mr. and Mrs. Martin Martindale and Miss Mary C. Howard, of Indianapolis, are visiting friends and relatives in the county.

Mr. and Mrs. Marion W. Bridges and children and Miss Bess Shackelford have returned from a two weeks' stay at Olympian Springs.

Mr. and Mrs. John D. Henry, Mrs. J. H. Henry and Miss Aline Wilson were guests of Dr. and Mrs. Russell Henry in Winchester Sunday.

Mrs. L. G. Cannon, of Georgetown, was here for the week-end to see her uncle, James N. Anderson, who continues very ill at the home of her parents, Mr. and Mrs. John W. Lockridge.

Mrs. Fannie Stephenson and Miss Mae Stout, of the Mt. Sterling Millinery Shoppe, have returned from the markets, where they purchased a full line of fall and winter millinery and notions and studied the styles.

Mrs. Frank Masden has returned to her home in Kansas City after a visit to her mother, Mrs. Maggie Young. Mrs. Masden, always popular in social circles here was extensively entertained during her stay in Mt. Sterling.

Mrs. W. N. Jurey will arrive today from Roanoke, Va., to be the guest of her niece, Miss Aline Wilson, at the home of Mrs. Ida Rels on Locust street. Miss Wilson is a member of the faculty of the Conservatory of Music at Christian College, Columbia.

Mrs. Webster P. Huntington has issued invitations to a house party to be given at "Seven Gables," her summer home on Lake Erie, August 14. Her guests will be as follows: Mrs. Percy Bryan, Mrs. Josh Owings, Mrs. Jack Owings, Mrs. B. Frank Perry, Mrs. Charles Lindsey, Mrs.

Charles Kirkpatrick, Mrs. James S. Bogle, Jr., Mrs. Anderson Bogle and Mrs. Emilee Reid.

House Party

Miss Louella Robb will entertain a house party this week at her home in Jessamine county, composed of the following: Miss Mary Ellen Dale, of Eminence; Roger Bourland, of Lancaster; John T. Woodford, of Paris; Miss Virginia Ayres, Carroll Orear and Mack Carrington, of this city. Miss Robb will give a lawn party Wednesday night for her guests.

For Mrs. Cox

Mrs. Meredith J. Cox, of Nashville, was the guest of honor at a beautiful party given on Saturday afternoon by Mrs. Will Enoch at her home on Samuels avenue. Bridge was played and late in the afternoon Mrs. Enoch served a most delightful salad and ice course. Her guests were: Mrs. Cox, Miss Frances Kennedy, Miss Frances Bourne, Mrs. Leo H. Hombs, Mrs. William Tipton, Mrs. W. T. Hunt, Mrs. James Nesbitt and Miss Carl Robinson, of Washington, D. C.

Birthday Dinner

Mrs. Robert Wilson entertained a large number of friends and relatives at a dinner on Thursday of last week, celebrating the anniversary of her birth. At noon a delicious menu was served, and Mrs. Wilson's guests were: Mr. and Mrs. Martin Martindale and Miss Mary C. Howard, of Indianapolis; Mr. and Mrs. Elbert Gulon and son, of New Augusta, Ind.; Mr. and Mrs. William Clark and children, of Carlisle; Mr. and Mrs. Charles Maxey, of Flemingsburg; Miss Prudence Burns, of Mt. Sterling; Mrs. Ruth Elam and daughter, of Spencer, and John Lee and Miss Eliza Maxey, of Stepstone.

Mrs. Gay Entertains

Mrs. James E. Gay was hostess at cards Friday afternoon, entertaining at her home on West High street in honor of Mrs. Arrington Johnson, of Columbus, Miss. Garden flowers in bowls and baskets adorned the rooms and porches and following the game lovely refreshments were served. Assisting Mrs. Gay were Mrs. Robert Vanarsdell, Mrs. Irwin Wood and Mrs. Walter H. Bridges. Her guests were: Mrs. Johnson, Mrs. Howard Turner, Mrs. David Chenault, Jr., Mrs. Stewart Sharp, Mrs. Seth Botts, Mrs. Dillard Douglas, Miss Laura Hart, Mrs. Carl Robinson, of Washington, D. C.; Mrs. Will Nelson Hoffman, Miss Catherine Howell, Mrs. Kenneth Collins, of Tennessee; Mrs. Joe Brown, Mrs. Keller Greene and Miss Mary Vansant Robertson.

BIRTHS

A message received here announced the birth of a son to Mr. and Mrs. Stanley Brown in Chicago, August 2. The child has been named Stanley Allen.

NATURE STUDY FOR LITTLE CHILDREN

When Froebel was looking for a name suitable for his system of education, he did not call it "Child School," or "Child House," but "Child Garden," and he intended that the "gardener" of the kindergarten should be the teacher herself.

Nearly half of Froebel's Mother Plays deal with the things of nature. At one time he said, "A little child that freely seeks flowers and cherishes and cares for them in order to wind them into a bouquet for parents or teachers cannot be a bad child, or become a bad man. Such a child can easily be led to the love, and to a knowledge of his Father—God—who give him such gifts."

Love of nature is the heritage of childhood. It is a tendency in every child of every land, be he black, white or yellow.

All nature is akin to childhood; birds, animals, flowers, insects are all beautiful to children, even the "lovely crawling caterpillar" and the "sleepy snail."

We all know how a dog will allow a child to stumble over him, recognizing the action by only an expression of long-suffering indifference; he will stand all kinds of teasing which he would not tolerate from an adult.

There seems to be a silent but mutual understanding among young animals of all kinds whether they have four legs or two.

As primitive man opened the early scenes of his life among the wonders of nature, so the child needs the experience of the race in nature wonder and play. All natural phenomena are matters of personal interest to the young child, and towards the moon, stars, sun, wind and rain he feels the inherent interest of the race.

It is well to be able to tell the children the names of the plants and flowers they bring, and to awaken in them a longing to know more of the wonderful life of the bird, bee and other insects.

Children love the stories of animal and plant life; they love nature because they are a part of it. It is a good thing for children to collect specimens; how they revel in the woods no matter what season it may be! What can be more joyous than to gather acorns, nuts and berries in the autumn woods? Will not the children be interested to know that acorns grow only on oak trees, and that they are the seeds of the oak as well as food for squirrels?

We may have only a vacant lot

near, but, if so, we possess a whole plant colony, for

"In the mud and scum of things There always, always something sings."

How many different weeds grow there? Why can some grow there, while others are unable to do so?

One of our most delightful kindergarten excursions was the suggestion of a child, to see how many different kinds of clover we could find, and no one seemed bored. We need not be surprised if questions or real scientific value be asked by the children—"Why do people call those white flowers dogwood?" was the thoughtful inquiry of one of my kindergarten children.

"How do birds fight snakes?" "What is the grease inside the buttercup used for?"

"Is it true that only female polar bears hibernate?"

"Why does the mullein have such a fuzzy coat?"

This shows a spirit of real inquiry.

How the child's imagination grows as he pictures the building of the nests, the return of birds and insects! Their songs become part of his nature, and give strength and sweetness to his life.

To cultivate direct observation, to enlarge the growth of character, to stimulate the imaginative powers, in others words to see things, to know things—does it not seem worth while?

Who knows the inspiration given to an embryo artist, poet or scientist, when we wander with the fairies through the meadows and woods, enjoying with them the concert of insect, bird and breeze?—Augusta M. Swan.

SANITARY TERMS EXPLAINED FOR LAYMEN BY DEPARTMENT

Pointing out that an insecticide is not a dependable disinfectant and that there is a wide difference between an antiseptic and a deodorant, the United States Department of Agriculture emphasizes the use of the right preparation in disinfecting any premises. Sanitation is especially important in preventing losses from animal diseases, and, along with attention to cleanliness, disinfectants are frequently necessary, especially after an outbreak of a contagious disease. Here is condensed information on the subject, prepared as a result of the department's experience in advising persons who misunderstand the purpose and correct use of disinfectants.

The word "infected" means contaminated with or affected by disease germs; "disinfected" means freed of disease germs. A "disinfectant" is a product that destroys germs or renders them harmless. An "antiseptic" is a substance that prevents the development and growth of disease germs, but an antiseptic is not a disinfectant unless it is capable of destroying disease germs in addition to preventing their growth.

A disinfectant is not necessarily an "insecticide," for some powerful disinfectants are relatively harmless for insects and the best insecticides may be of little value as disinfectants.

Formaldehyde is one of the most powerful disinfectants known, but it is a very weak insecticide; and, conversely, hydrocyanic acid is deadly for insects and all forms of animal life, while it has little power as a germicide or disinfectant. It is well to remember also that "deodorants" are not necessarily disinfectants—one destroys odor, the other destroys germs.

No single disinfectant is appropriate in all cases. Select the proper substance, apply liberally, allow ample time for the disinfectant to do its work, and remember that success depends in large part upon the care and exactness of the person who prepares and applies the disinfectant.

Scott—Georgetown, 3rd Monday.
Wayne—Monticello, 4th Monday.

One hundred and thirty-six thousand four hundred and forty-one boys and girls were enrolled in agricultural extension clubs in 1921 for training in various phases of livestock work. These junior farmers owned last year 76,148 head of farm animals and 564,286 fowls, representing a total value of \$3,606,176.

LOST, STRAYED OR STOLEN—From Woodford's farm, a brown mare mule, 15 1/2 bands high. The person who returns or gives information so that the mule be recovered will be awarded.—C. C. West, Leves, phone 327-1. (82-1f)

ONE-THIRD OF HENS FOUND TO BE CULLS

Results already obtained in the poultry culling demonstrations being conducted over the state by the extension division of the College of Agriculture indicate that the annual quota of one-third of the hens in Kentucky will stop laying within the next month and loaf until spring, according to H. R. Jackson, one of the college poultrymen. The demonstrations, which are being held to show farmers and poultrymen how to distinguish between laying and loafing hens, also show that the percentage of culls in flocks that have been fed and managed according to recommended methods during the summer is smaller than in flocks where little attention was paid to the feeding and care of the birds, Mr. Jackson said.

He has conducted demonstrations on a total of 24 flocks up to the present time and handled 1,417 birds, 28 per cent of which, or 411, showed the characteristic signs that they had stopped laying. The percentage of loafers in some flocks was as high as 58 per cent, while in other flocks that had been well cared for the percentage of culls was found to be as low as eight per cent. Thirty-five birds in one poorly managed flock of 60 hens had stopped laying while only three in another flock of 35 hens that had been well fed proved to be non-layers.

"One poultryman, whose flock was culled in the demonstration found that keeping sour skim milk before the birds at all times and feeding them a grain of equal parts of corn and oats at night was a good method of keeping up the egg production of his hens," Mr. Jackson said. "Another was obtaining good results by making a mash of ground oats and bran that was moistened with sour skim milk and fed during the day. He also gave them sour skim milk to drink. On the college farm good results in egg production are obtained by keeping sour skim milk or buttermilk before the birds at all times and giving them a grain feed composed of seven parts of whole corn and three parts of oats. The hens are forced to drink the milk at the rate of one gallon a day for every thirty hens."

STATES GET WAR MATERIALS FOR USE IN ROAD BUILDING

Surplus war material valued at \$139,773,986, was delivered to the states for use in road construction up to July 1, reports the Bureau of Public Roads, United States Department of Agriculture. The material, which consisted of all sorts of supplies and equipment suitable for road building for which the war department had no further need, was distributed on the same basis as monetary federal aid.

In value of material delivered, Texas and New York lead with nearly \$8,000,000 worth of material, and every state with the exception of five of the smaller one received supplies valued at over \$1,000,000.

This material has been of great value in road construction, and there is hardly a county in the United States in which some of it has not been used.

Probably of greatest value has been the 29,325 motor vehicles distributed, consisting of 24,752 trucks and 4,573 automobiles, and in addition a large number of tractors.

The system of distribution has been so arranged that the states requisition only material useful to them. In some cases they fall behind in allotments in order to wait for material particularly desired. Many of the states have shown great ingenuity in conditioning worn equipment, using war material to equip shops in which other war material is made suitable for use.

There is still a large quantity of material in this country for distribution. This will be further increased by material used by the army of occupation in Germany soon to be brought back.

CLUB BOYS' SUCCESS POINTS WAY TO CHANGE OF CROP

Their cash crop, alfalfa, threatened with weevil from a neighboring county and consequent quarantine, farmers of Fernley community in Lyons county, Nevada, began looking about for some other crop to grow for sale. One farmer recalled that five agricultural club boys had been growing potatoes according to methods shown them by the extension service and had harvested from nine to thirteen tons an acre. He was so favorably impressed with their report of the enterprise that he leased forty acres of alfalfa land, planted potatoes and obtained eight to nine tons an acre. Other farmers became interested and in 1921, 300 acres of potatoes were grown in the community.

The girl who is so homely that she has a muddy complexion usually has a clear conscience.

(Too late for last issue)
Mr. and Mrs. Robert Woolwine are receiving congratulations over the arrival of a ten-pound daughter, born Saturday. The little miss has been named Georgia Mae.

Charles Sullivan, Mrs. Lula Jones, Mr. and Mrs. Thomson Johnson and two daughters, Mattie Clay and Grace Jones, Mrs. John Carpenter and Emerson Havens spent Sunday with Mr. and Mrs. E. D. Jones and family.

John Carpenter and Holly Eubank attended the ball game in Mt. Sterling Sunday.

Mr. and Mrs. Bryant Curtis and little son, William C., spent from Friday until Monday with Rev. and Mrs. Reynolds.

Prewitt Jones, of Coffin Creek, W. Va., has returned home after visiting his parents, Mr. and Mrs. E. D. Jones, and family. Mr. Jones was accompanied home by his sister, Miss Martha Jones.

Rankie and Russell Bailey spent Sunday at Boonesboro.

UPPER SPRUCE
By Maggie Willoughby

(Too late for last issue)

Mrs. Howard Barnes gave the boys and girls an apple peeling party on Monday night. A large crowd attended and everybody had a nice time.

Misses Maggie and Sallie Willoughby were guests of Mrs. Charles McCall in Mt. Sterling Saturday and Sunday.

Mrs. Mary Powell and children are visiting Mrs. John Strange this week. School began here Monday. Miss Ida Mae Ensor is teacher.

Mrs. Arminy Willoughby, after being sick for some time, is able to be about again.

George Brisco and Zea Willoughby attended church services at Morris Creek Wednesday night.

Rev. Alonzo Willoughby sold a load of chickens and eggs today. Will Martin's dog went mad and was killed.

FOR SALE AND EXCHANGE—

On Logan avenue and 7th street, in Paris, Ky., a two-story brick residence with all the modern improvements. The residence is on a lot 80x200 feet; has 9 rooms, porches and halls. This is desirable property, well worth the money.—See H. C. McKee. (71-1f)

If you really have something to say, the fact that you lack an extensive vocabulary won't handicap you.

Produce Review

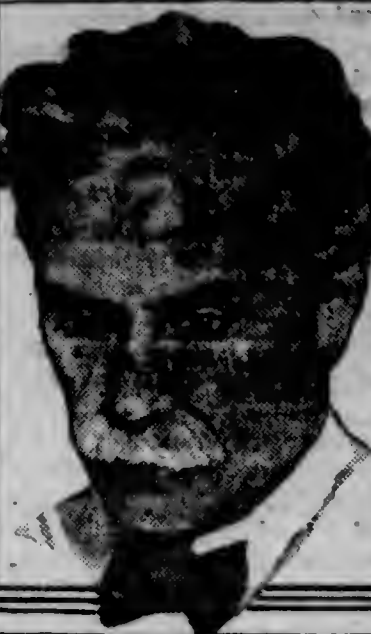

Butter production has been heavier than during the corresponding period last year. There has been little change in prices throughout the producing sections. Demand for current consumption continues good, although some surplus is finding its way to storage.

Egg receipts are above normal and are somewhat in excess of the supply required for current use, the surplus being placed in storage. The stocks in cold storage are unusually large for this season of the year. The lower prices prevailing, is passed along to the consumer, should bring about a better demand.

Ample poultry for current use is being marketed, and as spring chickens reach the marketing age, the movement will undoubtedly increase, resulting in some decline in buying and selling prices.

BEEF AND COAL

Jersey Progressive says government owned railroads would hurt the trusts.

George L. Record, progressive aspirant to the seat now occupied by U. S. Senator J. S. Frelinghuysen of N. J., is advocating Federal ownership of railroads as a way to curb vicious methods of the beef and coal trusts.

MINIATURE FARM SHOWS SYSTEM OF CROP ROTATION

In Thayer county, Nebraska, the county agent wished to show to as many farmers of the county as possible a system of crop rotation adapted to their needs. He selected the county fair as an opportunity of meeting perhaps the largest number of farmers at any one time. Securing from the fair board a seven-foot square space in a prominent part of the fair grounds, he laid off on it a miniature farm with fields in proportion to the seven-foot space. Corn, oats and wheat were sown in the fields in time to be growing nicely when the fair opened; imitation trees were placed to show the location of the orchard, and small models of farm buildings added. Over 15,000 persons visited the tiny farm during the fair, studying the plan and asking questions about the rotation system.

See The Advocate for printing.

Tired

"I was weak and run-down," relates Mrs. Eula Burnett, of Dalton, Ga. "I was thin and just felt tired, all the time. I didn't rest well. I wasn't ever hungry. I knew, by this, I needed a tonic, and as there is none better than—

CARDUI
The Woman's Tonic

... I began using Cardui," continues Mrs. Burnett. "After my first bottle, I slept better and ate better. I took four bottles. Now I'm well, feel just fine, eat and sleep, my skin is clear and I have gained and sure feel that Cardui is the best tonic ever made."

Thousands of other women have found Cardui just as Mrs. Burnett did. It should help you.

At all druggists.

E. 57

BODY OF BELL ENTOMBED ON NOVA SCOTIA MOUNTAIN

Villagers of Baddeck, Nova Scotia, trudged to the peak of Benn Breagh mountain Friday evening and stood in reverence at sunset while the body of Dr. Alexander Graham Bell was laid to rest after a life of 75 years in which he gave the world the telephone and other inventions.

Over his tomb, blasted from rock, that looked down on all of eastern Nova Scotia, stood the watch tower built years ago by the inventor. Below the quiet woodland were the serene lakes on whose waters Dr. Bell experimented with speedboats and fast waterskies.

The lakes were still. In the village every shop was closed and each home sent its occupants to the mountain top. No one was left in the laboratories and workshops where Dr. Bell and his helpers busied themselves in summertime. Everyone had gone to give respect at the burial of the venerable scientist from another land.

First there were short services at the hillside home, attended only by close friends. When these ended, bronzed workmen employed on the estate lifted the coffin which had been built in Dr. Bell's workshops out of rugged pine and carried it to his coach, which led the cortege up to the highest top of the mountain.

His six-foot body silhouetted against the twilight sky, stood the village parson, the Rev. John Mackinnon, of the Greenwood Presbyterian church of Baddeck. Clustered about him down the slopes of the mountain were the Nova Scotians and a few who had gone from the United States.

Friends of the inventor recited one of his favorites—Longfellow's Psalm of Life—

"Tell me not, in mournful numbers, Life is but an empty dream."

Then the Ninetieth Psalm—

"The days of our years are three score years and ten; and if by reason of strength, they be four score years, yet is their strength labor and sorrow; for it is soon cut off, and we fly away."

And the first stanza of the Requiem of Robert Louis Stevenson—

"Under the wide and starry sky, Dig the grave and let me lie, Glad did I live and gladly die, And I laid me down with a will."

Then, as the day departed, the body was entombed.

For one minute during the service the 13,000,000 telephones in the United States and Canada were silent.

LIME TONIC IS PRESCRIBED FOR KENTUCKY'S SICK SOIL

Nearly all of the upland soils in Kentucky that are not of limestone origin and a large area of the state's limestone soils, including some of those in the blue grass region, are acid to an injurious extent and need limestone before they can be expected to produce the greatest crop yield, soil authorities who have investigated the problem say. Applying lime at this time of the year to correct this condition has a number of distinct advantages that are not possible at other times, according to George Roberts, head of the agronomy department of the College of Agriculture.

"The preparation of wheat land at this time of the year offers one of the best opportunities for applying limestone since quick returns can be obtained for its use. If used with phosphate, the material will return added fields and increased profits on the wheat crop and give still greater returns on the clover crop which usually follows the wheat. The good condition at this time of the year and the fact that more time usually is available on the average farm are added advantages in using lime now. Another important point is the fact that the demand usually is slack at this time of the year, making it easier to obtain the material.

"As an average for eight years on four of the soil experiment fields being maintained over the state by the Kentucky Agricultural Experiment Station, limestone and acid phosphate have given an increase of 9.6 bushels an acre a year in the wheat crop. This was more than enough to pay for the application of limestone which will last for at least three more crops in the rotation. On the same fields, the increase in the clover hay crop from limestone, in addition to that from acid phosphate, has been approximately 1,500 pounds an acre. Limestone and phosphate have produced an increase of clover hay totalling more than a ton an acre a year on the same fields as an average for eight years. During the season just passed, the corn yield on the Berea experiment field has been increased 26 bushels an acre by the use of limestone and acid phosphate."

HUNDREDS OF DISABILITY CLAIMS FILED IN STATE

The American Legion state-wide campaign and service census resulted in the filing of many hundred claims for disability due to service in the world war. Almost every county in Kentucky has an American Legion service officer or Red Cross secretary whose services are available to assist disabled Kentuckians in preparing their claims.

To date Kentucky disabled ex-service men's board has on file approximately 1,300 cases of men who are suffering disability on account of their world war service and who have not been able to secure adequate compensation. This board was created by the 1922 legislature for the purpose of assisting them in securing their compensation. So far more than three hundred cases have been settled through the efforts of the board and other cases are being rapidly disposed of. Any disabled men who have not received proper compensation should write the secretary, Henry J. Stiles, 308 Louisville Trust building, Louisville, and furnish him with details of disability and cause of complaint, and include the claim number which is found on the right hand side of correspondence from the United States Veterans' Bureau.

Jackson Morris, chairman of the board, states that in addition to new claims and old claims as yet unsettled, that there are many instances of men formerly drawing proper compensation who have had their compensation either decreased or entirely stopped without good cause. These men should also write Mr. Stiles promptly so that the board can assist them in re-instating their compensation.

VITAMINES NOT ELIXIR OF LIFE

The following article was written by P. K. Holmes, M. D., head of the Department of Hygiene and Public Health, University of Kentucky:

It seems to be popular today for everyone to think in terms of vitamins. More is now being written and said about vitamins than about any other phase of diet. When a notable scientific discovery is made its importance is apt to become over-emphasized. A lot of "fool stuff" is now being written and said about vitamins. The food faker and the patent medicine vender are working over time on the job.

The average reader does not know enough about vitamins to refute their arguments. He is made to think of vitamins as the "elixirs of life." These people would make us believe that their particular vitamin preparations are the only links between disease and health, or life and death. Some of these preparations may be of questionable benefit; others are absolutely worthless. Through extravagant claims sick people and others are led to put dependence upon these questionable or worthless preparations to the exclusion of those foods which are vital to health and life itself.

Until comparatively recently chemists and physiologists thought that diet consisted entirely of those elements which supply heat and energy and build tissue; in other words, if our meals contained the proper quantities of carbohydrates (heat and energy producers), proteins (tissue builders), fats (heat and energy producers), and organic salts (lime, iron, phosphorus, etc.) they would be completed. Recent experiments show that these alone are not sufficient to maintain health and life. The substances which have to be added to these in order to maintain health and life are called vitamins.

The word vitamins means something essential or vital. Vitamins are called "accessory food factors." As yet, no one knows just what they are, what their chemical formula is, what they look like, or what is their direct action. We have learned through experimentation that certain foods contain these essentials while others do not. When animals and men are fed entirely upon foods which do not contain vitamins characteristic diseases and death results.

Vitamins are so plentifully distributed in our various articles of diet that it is entirely unnecessary to resort to the use of yeast, raisins, patent foods and preparations in order to have them supplied. While it is true that vitamins, of which we know little about, are essential, it is also true that other things, such as mineral salts, of which we know much more about, are equally as essential.

Vitamins are probably not manufactured in the body of animal or man, except when they are supplied for this purpose in the food eaten. Milk cows eating food poorly supplied with vitamins will also be deficient in them. Nursing mothers may determine the vitamins supply of their babies by their own diet. Vitamins are made only by plants. Their presence in the flesh of animals depends entirely upon the diet of the animals. Thus butter and milk are rich in them only as they are abundantly supplied to the cow.

At present, vitamins are divided into three classes, A, B and C. Vitamin A is called fat soluble A. Vitamin B is soluble in water and is called water soluble B. The third is called vitamin C. Vitamin A is not as widely distributed in nature as vitamin B. Vitamin A is abundant in milk, butter, eggs and in the glandular organs (liver, kidneys, etc.) of animals, and in small amounts in the seeds of such grains as wheat, rye, barley, oats, etc. Vitamin B is abundant in yeast, in the germs of all seeds, in peas, beans, leafy vegetables and to a small extent in milk. It is almost absent in sugar, starches, refined flours, fats and oils. Vitamin C is abundant in most all fruits and especially in oranges and lemons.

ons. It is abundant in cabbage, onions and tomatoes. Raw meat contains it in small amounts.

It is thus evident that one does not have to feel that health and life depend upon the use of these patent life savers. The only thing necessary is to see that the diet is reasonably varied. If fresh milk, butter, eggs, vegetables, green tops, fruit, fresh meat, etc., are in our diet we need have no further concern about vitamins.

* FARM AND HOME NEWS
* FROM OVER KENTUCKY
* *

Farm boys and girls of Campbell county who are members of the various junior agricultural clubs in that county have been showing lively enthusiasm in the picnics and tours which they have arranged during the summer with the help of County Agent H. F. Link. Two clubs raised enough funds to hire trucks for a trip to interesting points in Cincinnati and vicinity, while another group of youngsters visited the Kentucky Agricultural Experiment Station and prominent farms in the blue grass district.

More than 120 Whitley county farmers and poultry keepers recently were taught the method of distinguishing between the laying and the brooding hens in their flocks by the means of a number of poultry culling exhibitions held by County Agent E. F. Davis and the College of Agriculture extension division. A total of 108 hens out of the 238 that were handled showed the characteristic signs that they had stopped laying.

Christian county farmers and their wives who attended the recent all-day poultry school and picnic held at Hopkinsville obtained many new pointers on poultry management and care, County Agent H. G. Cress says. J. H. Martin, in charge of poultry work at the College of Agriculture, at Lexington; A. J. Culver, who is said to have one of the largest poultry flocks in the state, together with a number of Christian county poultrymen, took part in the program.

As the result of six Oldham county farmers growing barley during the last year, indications are that the acreage of this crop sowed in that county this fall will be ten times as great as that sown last year, County Agent Gordon B. Nance says. Farmers who usually sell wheat and buy corn will replace the wheat with barley.

Tuberculosis in cattle cannot be kept under control, much less eradicated, if grade animals are omitted in the clean-up of any territory. Whole areas, therefore, like townships and counties, should be cleaned up rather than scattered herds, if the work is to be of permanent value and handled in the most economical way, says the United States Department of Agriculture.

The tear is playing a new role in jurisprudence. Women jurors in California wept when they could not get the men on the jury to agree with them.

ROWAN COUNTY

S. S. Cassidy, Correspondent

The normal school commission "came and saw" Thursday afternoon after a brief visit to West Liberty. They reported a royal reception by the good people of that town and county. Not bragging on ourselves, but we did the best we could to make their visit to Morehead pleasant and interesting. The first meeting was public and was held in the court house yard. James Clay, as spokesman for Morehead and Rowan county, delivered the address of welcome, which was both earnest and eloquent. We have heard a number of people say it was the best speech they ever heard in Morehead. Judge Ed C. O'Rear, chairman of the commission, responded in his always happy style and was followed by the scholarly and dignified Professor Harmon. The Morehead band was supplemented by the Owingsville band and the vast crowd assembled in the court yard enjoyed a free flow of Kentucky eloquence and delightful music. There was a good attendance from all adjoining counties, and the Owingsville band came on its own initiative, which shows the interest our neighbors in Bath county have in the location of the school at Morehead. After the court yard meeting the members of the commission enjoyed a "spin" down the Midland Trail to Farmers and return, just after making a thorough inspection of the school ground and equipment. Then came the banquet, given by the Woman's Club, of which Mrs. E. Hogge is president, at Hodson Hall in the evening. The table was laden with everything desirable that culinary skill and good taste could suggest. The banquet was limited to the school commission and the reception committee appointed by the Commercial Club and ladies of the Woman's Club. The decorations of rare flowers, skillfully arranged, lent much beauty to the occasion as "the lamps shone o'er fair women and brave men." The pleasant memories of this banquet will go with all present till each shall take his or her chamber in the "silent

FARM LOSES LURE

WHEN MOVIES CALL

Rudolph Valentino, the dark, stalwart hero of Rex Ingram's productions for Metro, "The Four Horsemen of the Apocalypse" and "The Conquering Power," coming to the Tabb Theatre Wednesday night, has had a wide and varied career in other fields than moving pictures. Mr. Valentino was born in Italy 27 years ago. He received his early education in the public schools of Italy, later attending the Royal Military College of Agriculture at Genoa.

At the age of 18 he came to the United States, intending to put into practice some of the knowledge of farming acquired at the agricultural college in his native land. Instead, he turned his attention to dancing and soon gained an enviable reputation as a professional entertainer. He was the partner of Bonnie Glasse, famous dancer, with whom he appeared at Rector's. Later they appeared at the Winter Garden, where success was so marked that they were signed for a vaudeville tour on the Orpheum circuit.

Then he went to the pictures and has appeared in many of the biggest pictures with some of the most famous stars of screen and stage. He is now at the zenith of his popularity in the moving pictures.

halls." The following ladies of the Woman's Club were in the receiving line: Mrs. E. Hogge, Mrs. S. M. Bradley, Mrs. Irvine Rhodes, Mrs. S. S. Cassidy, Mrs. J. W. Townsland, Mrs. C. U. Waitz, Mrs. W. T. Caudill, Mrs. A. L. Miller, Mrs. J. W. Riley, Mrs. S. M. R. Hurt, Mrs. W. E. Bradley, Mrs. Guy Snyder, Mrs. Batson, Mrs. C. E. Bishop and Miss Irene Hogge. The members of the commission were guests of the Midland Trail Hotel Thursday night, leaving on train No. 25, west bound, Friday morning. We are still hoping to get the school, but we have no mud to fling at the other contesting towns, nor members of the commission, all of whom are high-class gentlemen. Notwithstanding they have been the victims of dirty assaults and insinuations by a few narrow and envious little sapsuckers, they have wisely ignored it all, knowing as they know, that the people know them and they cannot afford to compromise their manhood by taking issue with such birds.

NORMAL SCHOOL BODY

FAILS TO NAME SITES

After taking a total of fifteen ballots, the state normal school commission meeting at Lexington Friday adjourned to meet again subject to the call of the chairman, Judge E. C. O'Rear, announcing that no decision was reached as to the location of the two normal schools authorized by the 1922 general assembly.

Eleven ballots were taken on the nine sites offered in western Kentucky and four on the five sites in the eastern part of the state.

A majority of the eight members of the commission must agree on a site for its selection, and one site in the western section and one of the eastern Kentucky sites received four votes, one short of the needed five, according to W. S. Wallen, of Prestonsburg, the secretary of the commission.

No other meeting is expected for several weeks, as several members said that they could not spare more time in the immediate future from their business or professional pursuits. The commissioners at Lexington Friday from a two days' tour of eastern Kentucky towns bidding for one of the schools. The commission spent five days, July 16 to 21, in western Kentucky.

SAVINGS POPULARITY GROWS

As an evidence of the increasing popularity of treasury savings certificates with the general public, the savings division of the Fourth Federal Reserve district announces that the sales of these certificates for the seven months ending July 31 exceeded \$95,000,000, as compared with the sales of less than \$30,000,000 during

the same period of 1921. Sales during the month of July exceeded those during any previous month of the year. Of the \$95,000,000 sold over 16 per cent were purchased by investors in the district.

With all issues of Liberty bonds and Victory notes selling above par, treasury savings certificates, paying four and one-half per cent interest compounded semi-annually, and subject to no market fluctuation, yield a higher return to the investor than any other government obligation. These certificates can be purchased at practically all postoffices in denominations of \$1,000, \$100 and \$25. They mature in five years and are exempt from all state and local taxes and the normal federal income tax.

IT IS NOT EASY—

To apologize.
To begin over.
To take advice.
To admit error.
To be charitable.
To be considerate.
To endure success.
To keep on trying.
To avoid mistakes.
To forgive and forget.
To keep out of the rut.
To make the most of a little.
To maintain a high standard.
To recognize the silver lining.
To shoulder a deserved blame.
BUT IT ALWAYS PAYS.

An old timer notices that the senate has at least put a high tariff on nuts, and thinks it is probably a supplement to the immigration bill.

Something for the Pulpiters to Worry About—They want to dam the River Jordan now.
